Q&A

n

LAND USE

The land wil be less and less.

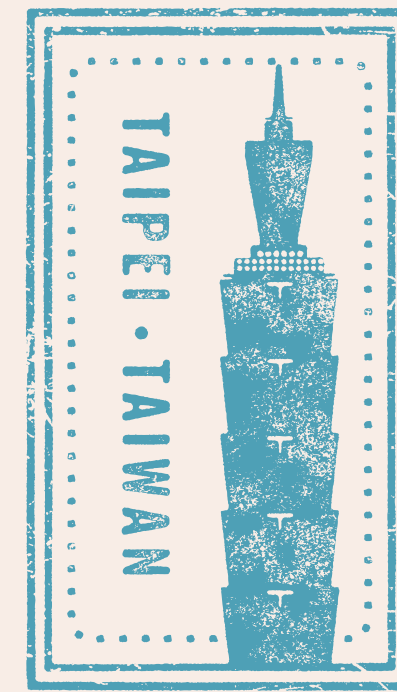

TAIWAN

When 2050, Taiwan will be underwater.

*3 million people

*6 cities in Taiwan

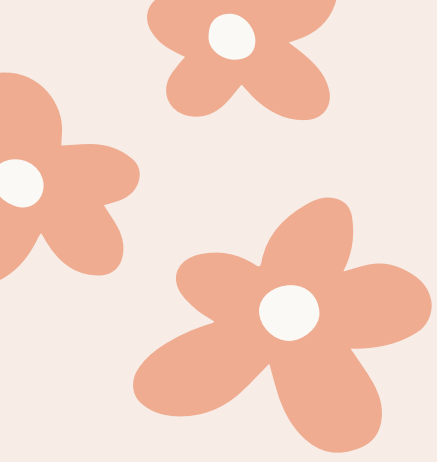

in ANPING

i live in Anping, but now there's a big problem. The icebergs melt and sea level rise, it also submerged our living environment.

FLOOD

The sudden melting of snow and ice
produces floods in rivers.

OUR LOW ENERGY HOUSE

LOW ENERGY HOUSE

We made a house to prevent flooding.

We have installed flood alarms when
floods come. Flood sirens will ring
and alert us to be careful.

This is our low energy house.

sirens

We put sirens on
the doors to let
us know when
we're in danger

AQUAPONICS

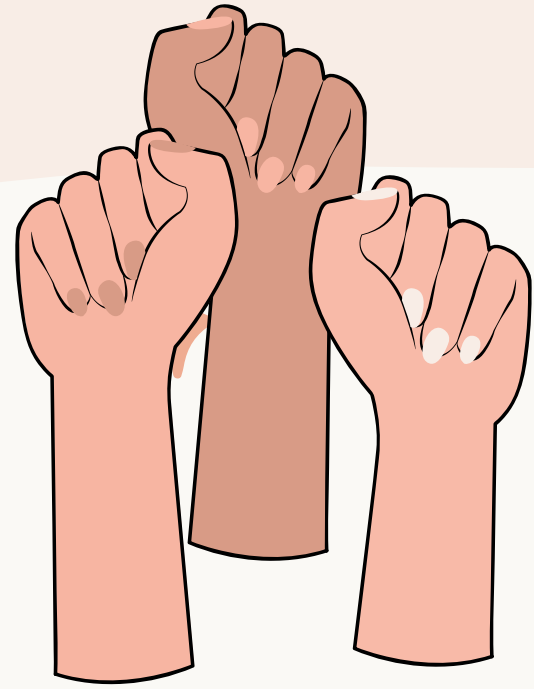

We use
aquaponics to
plant our food
and we also can
feed fish to eat.

Q&A

Q&A

1. What thing do we use to know when we are in danger?

Q&A

**2. What things do we also put in
our low energy house?
(except for sirens)**

Q

A

Thank you
