Outsider Invasion

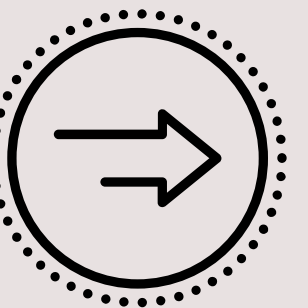

Outline

NEWS

Campus safety **raises the alarm** again! On the 26th, a legislator from central Taiwan reported that she received a distress message from a student the previous day, indicating that an **outsider** had invaded a campus in central Taiwan and engaged in **inappropriate and indecent behavior** towards students. The education authorities stated that, upon investigation.

NEWS

The "Twitter" account in question had posted mostly indecent content. They have asked the suspected school to **review relevant surveillance footage**. It was found that the perpetrator had entered classrooms without **authorization** **before the building was closed** and took indecent photos. All relevant information has been provided to the police for legal investigation.

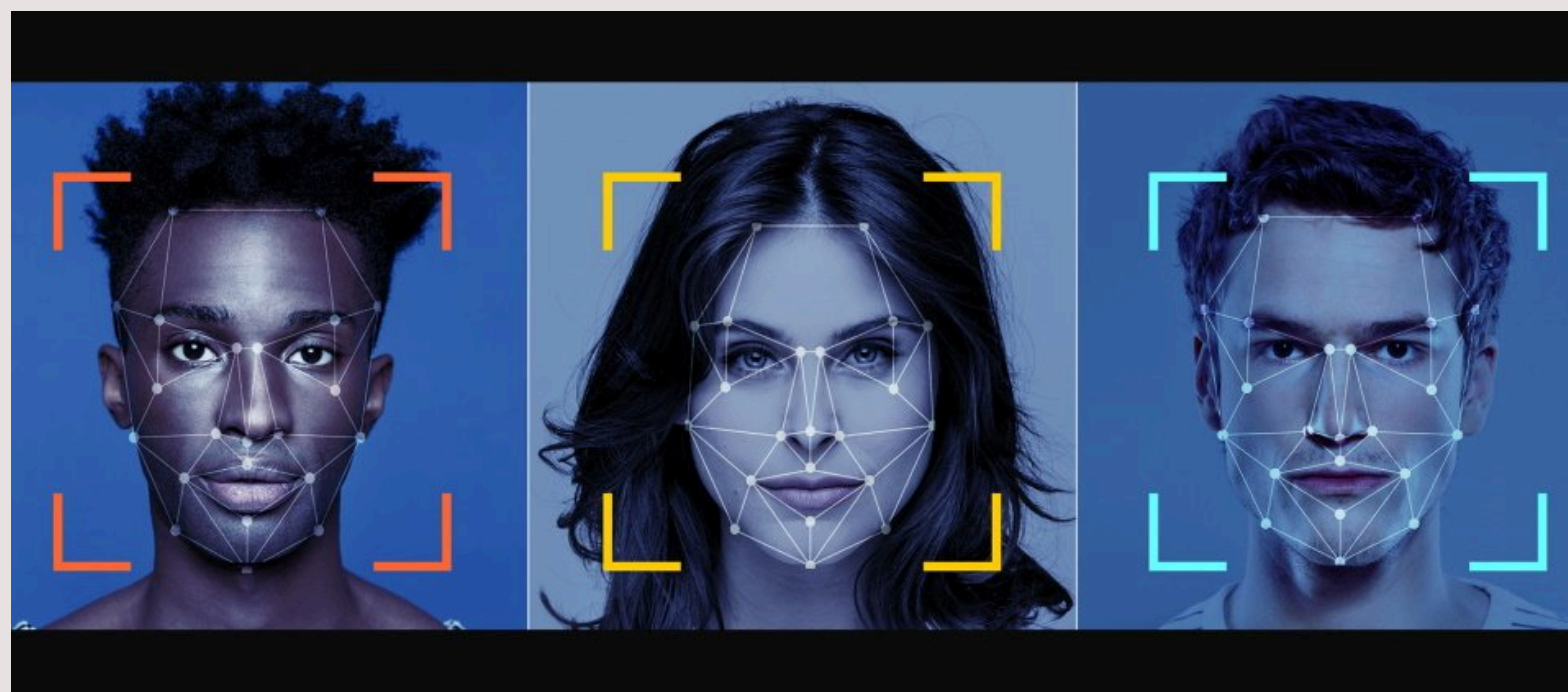

Set up facial recognition!

In a broad sense, facial recognition involves a range of related technologies used to build a **facial recognition system**. Including **facial image acquisition, face detection, facial recognition preprocessing, identity verification, and identity search**. In a narrow sense, facial recognition specifically refers to technologies or systems **used for identity verification or identity search** through facial features.
