Introduction to ship appearance

Introduction to the ship function

Main technologies: Air pollution sensors & air purifiers

Giant Air Purifier

大型空氣清淨機

Air pollution sensor

空氣汙染感測器

Main technologies: Air pollution sensors & air purifiers

Wind Turbine風力發電機

Function:

Wind turbines convert wind energy into electricity using blades that capture wind, a spinning rotor, and a generator.

Non-polluting automatic air purifier

無汙染自動空氣清淨機

Function: cleans air

Movable vacuum cleaner

移動式控氣清淨機

This movable vacuum cleaner can move around the ship. It can clean the floor and produce clean air.

Sprinkler and hydro-electric power

灑水器及水力發電

Sprinkler and house

The excess water will flow down and enter the hydroelectric power

Air Cleaning Air Conditioner

It can absorb carbon dioxide.
