

climate change

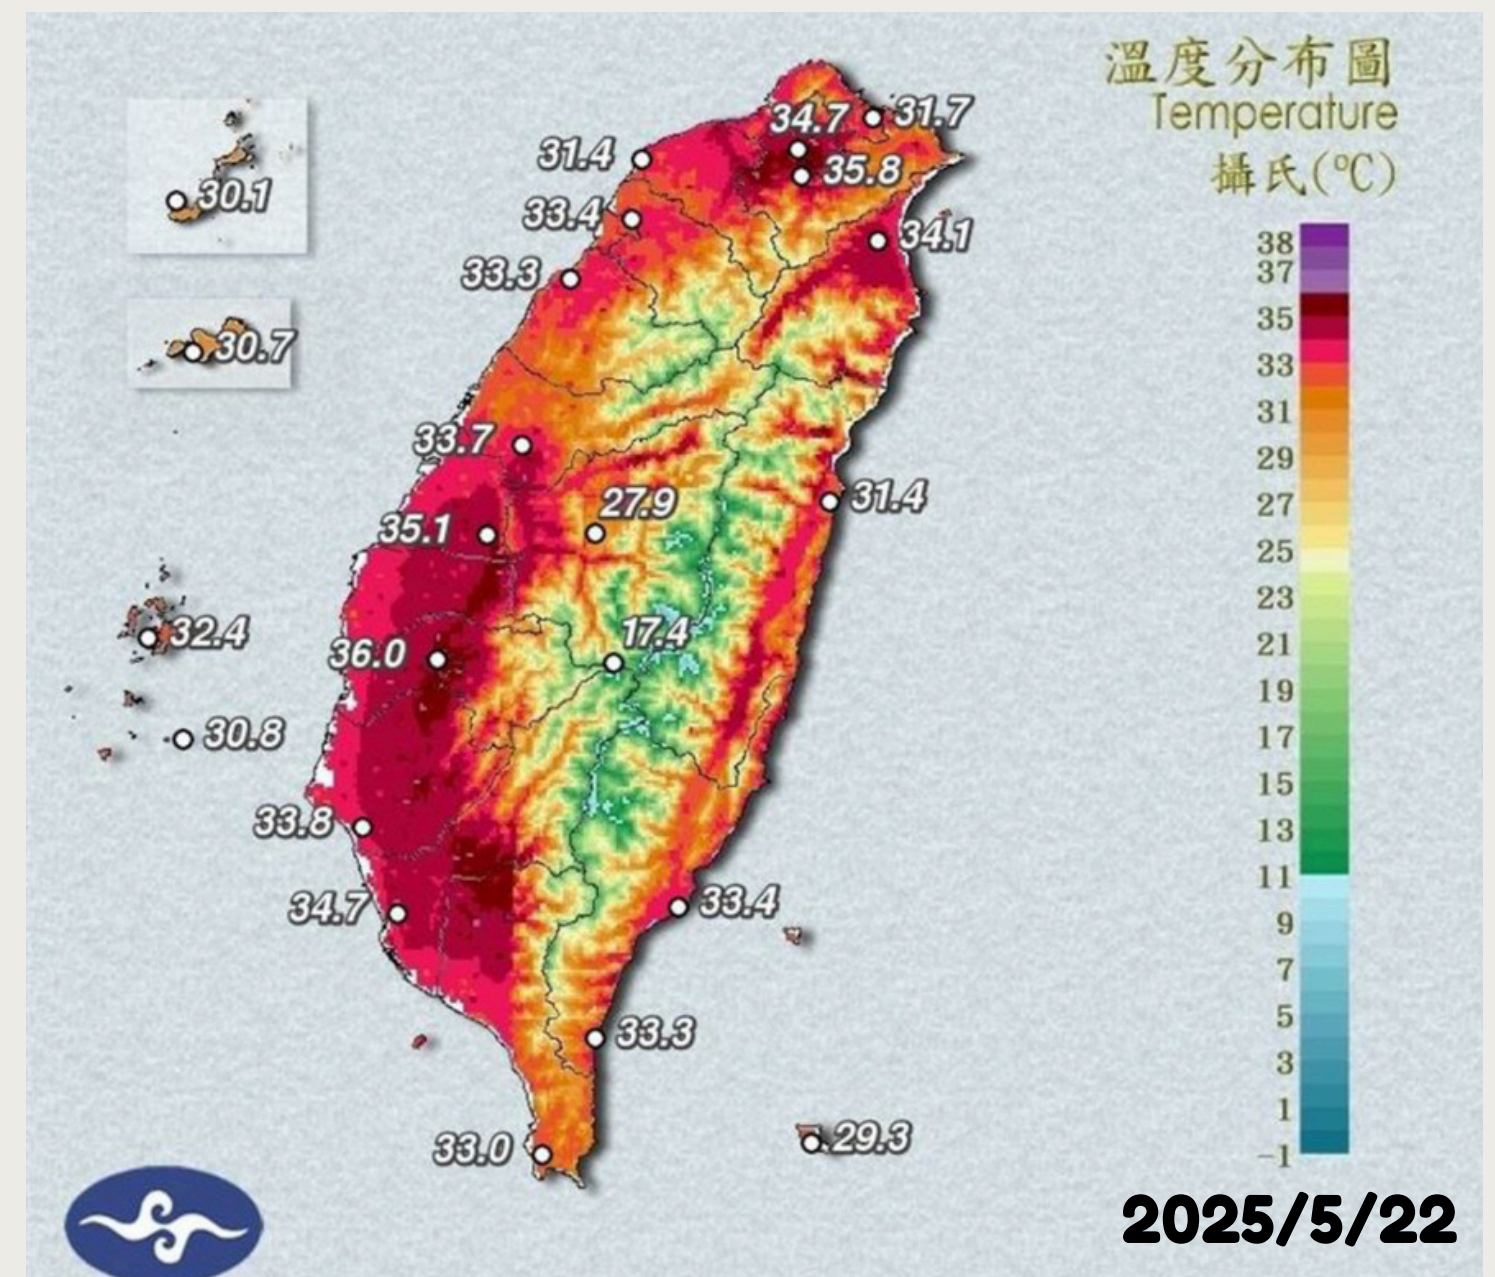

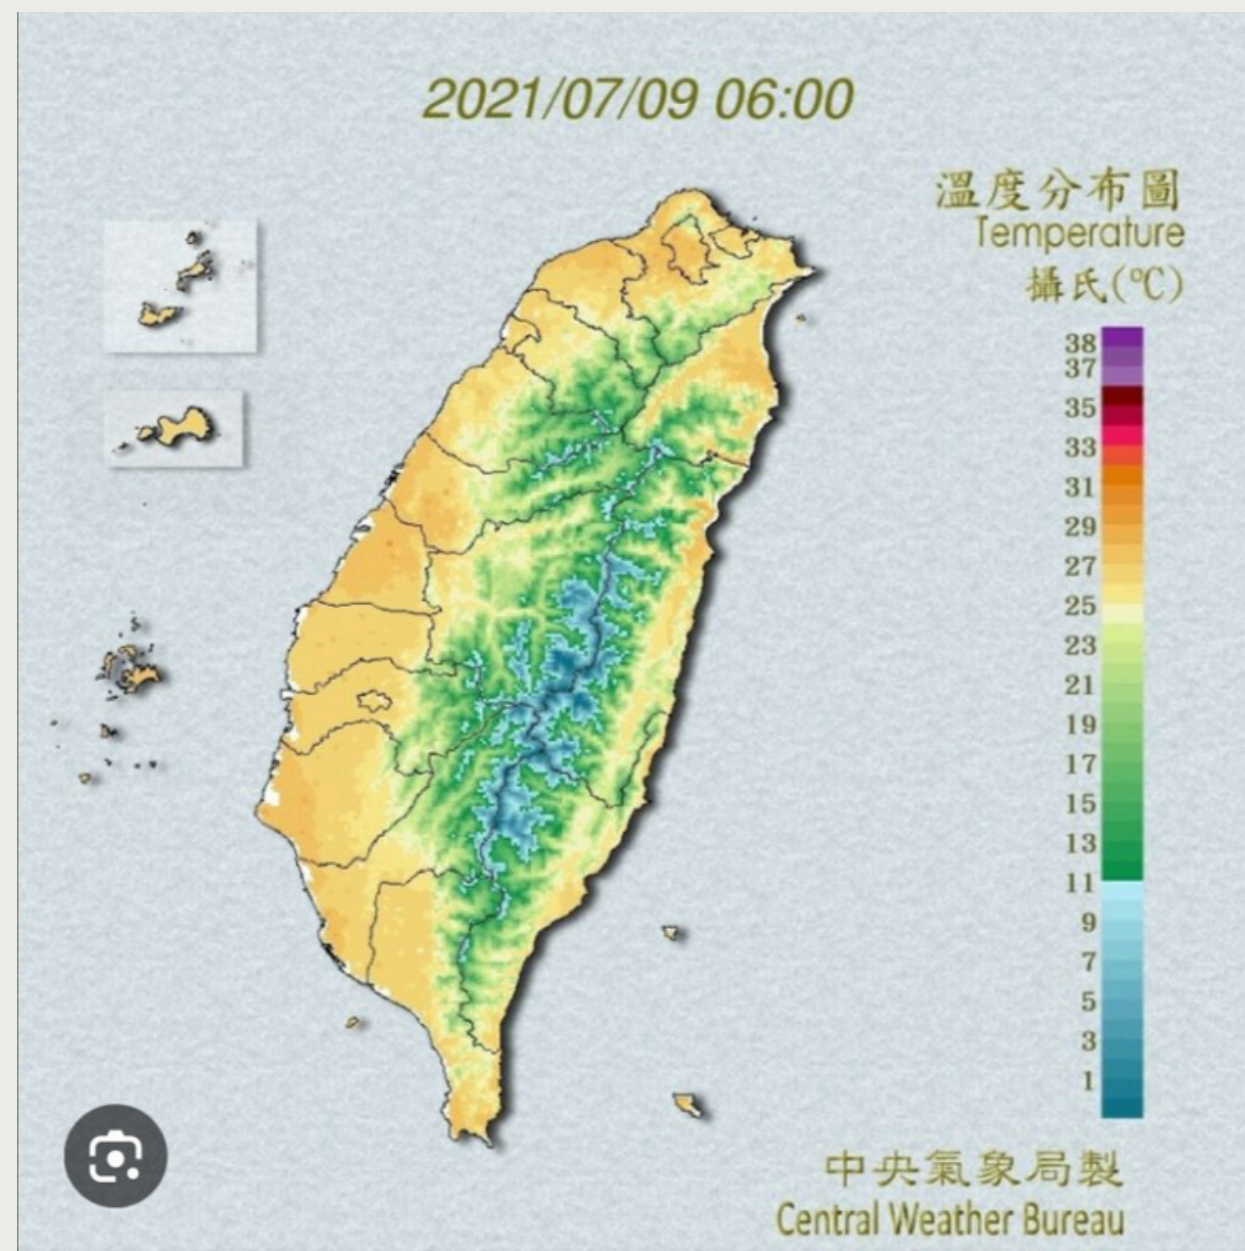

Holly Wume Pearl

Have you noticed it's getting hotter?

before

vs

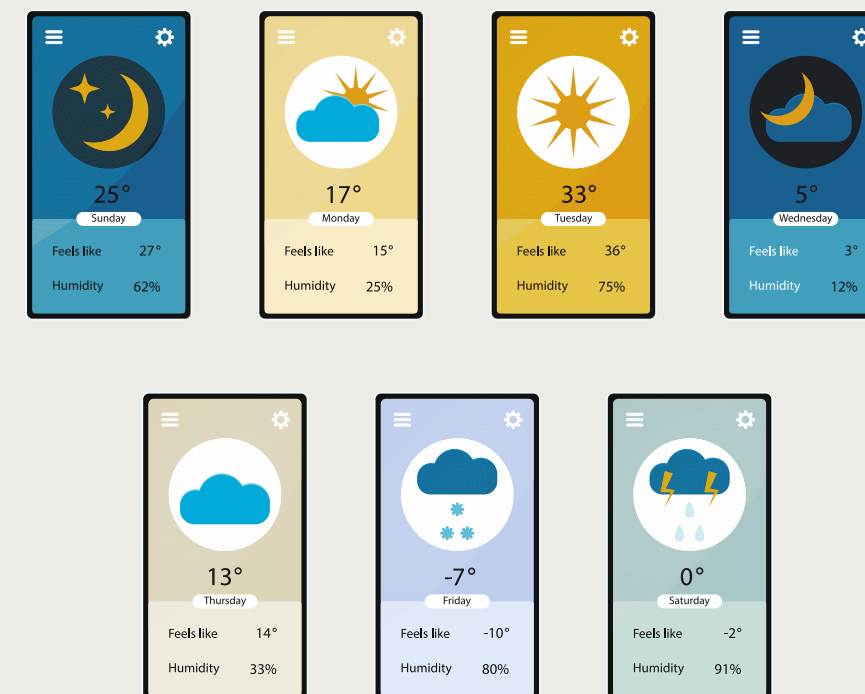

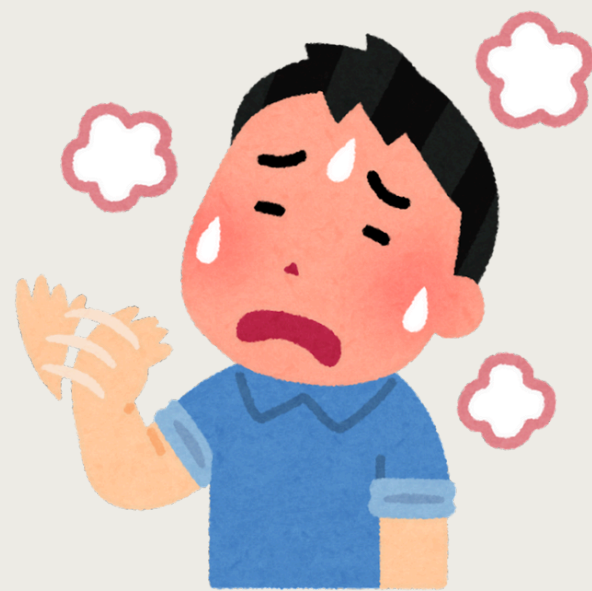

now

What is climate change? What is climate change?

📌 Climate change means the climate is slowly changing, like getting hotter or more rain

📌 **【Climate】** is the weather condition over a long period of time

為什麼會發生氣候變遷？

Why does climate change happen?

 **People drive cars and run factories, releasing greenhouse gases.**

 **Greenhouse gases make the Earth feel like it's covered with a blanket → it gets hotter and hotter (global warming).**

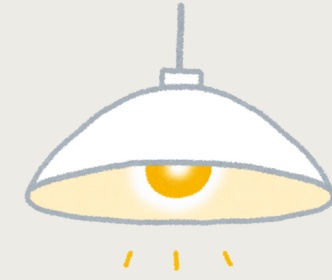

What Happens Because of Climate Change?

-  **Polar bears' homes are melting**
-  **More heavy rain and floods**
-  **Crops don't grow as well** 
-  **Some animals lose their homes**

What Can We Do? (Take Action!)

- **Plant more trees**
- **Turn off the lights when not in use**
- **Walk or ride a bike instead of using a car**
- **Recycle and reduce waste**
